

SAMMANSTÄLLNING AV COURSE EVALUATION FOR APPLIED PHAR-  
MACEUTICAL STRUCTURAL BIOINFORMATICS (3FF700, 3FF209)

Sammanställd	2017-12-01
Antal svar	9 av 75 (svarsfrekvens 12 %)
Tillgänglig	2017-10-23 – 2017-11-24
Kontaktperson	Maris Lapins (Maris.Lapins@farmbio.uu.se), verksam vid Farmaceutisk bioinformatik
Kurs	Applied Pharmaceutical Structural Bioinformatics (3FF700, 3FF209)
Program	Fristående kurser farmfak, termin ht17
Kursen pågår	2017-08-28 – 2017-10-13
Sammanfattning	<p>The course was much appreciated by the students who filled in the course evaluation. Two students mentions the good speed and level of the assignments. One student especially mentions that the course gave a good, broad overview and covered many things. The exercises during the course were appreciated along with the teacher's support.</p> <p>One student asks for more practical tasks and another student asks for lectures. One student explains that much times were spent on technicalities that could be avoided if a short introduction to Linux were given.</p> <p>Some students had issues with virtualbox.</p>

Denna enkät är framtagen av Grundutbildningskommittén och Farmaceutiska Studentkåren. Den gäller för alla kurser på farmaceutiska utbildningsprogram.

Tack för att du vill ge oss återkoppling. Vi är intresserade av just dina synpunkter för att kunna utveckla kursen du nyss gått. Sammanställningen och kursrapporten finns tillgänglig via Farmaceutiska Studentkårens handläggare och Studentportalen.

1. Ditt allmänna omdöme om kursen är att den var ( $Medel = 5,6$ ,  $SD = 0,5$ ) ( $1 =$  mycket dålig,  $6 =$  mycket bra)

## COMMENTS:

- This has been a VERY exciting course. The major drawback is that most of the time was used to technicalities that is only prerequisites for the course. There are a number of computer programs to learn and also the Linux operation system. I still do not know for sure how to enlarge and minimize the image on the screen and how to write a number of symbols. An amendment with a short introduction to Linux and how to establish a shared folder between Mac and Linux (in my case) would have resulted in considerably more time for the subject itself. [6]

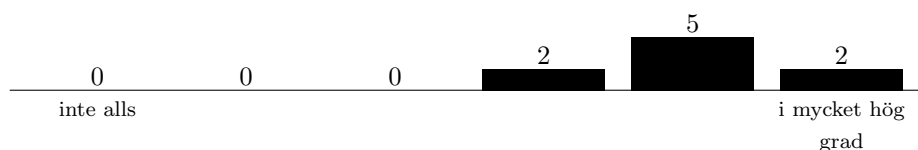

- Very good speed, level of taught knowledge, interesting tasks [6]
  - information was really useful for my study, if i have questions i can writte to trainer and all the time he answered very quickly [6]
2. Vad tyckte du var särskilt bra med kursen? Motivera. (*Antal obesvarade = 1*)
- I liked that it gave a very broad overview, and many different things were covered. I expected it to be a pure tertiary structure and binding course, so the predictions of secondary structures came in very hand for my daily research.
  - Veldig gode forklaringer til hvordan man gikk frem med oppgavene
  - Exercise 6. But I still do not understand why the box is needed. Seems to be a certain degree of subjectivity
  - Very good speed, level of taught knowledge, interesting tasks, good book
  - Intressant innehåll, bra kursmaterial
  - Step by step exercise and the feedback
  - excises were really important to improve information
  - Övningarna
3. Vad tycker du kan förbättras? Motivera. (*Antal obesvarade = 1*)
- I would have enjoyed a bit more docking and evaluation of models by looking at the ligand-receptor interactions on a scale of interaction between atoms.
  - ingenting
  - If the technicalities become more streamlined more time can be devoted to the application of bioinformatics. More practical tasks would be magnificent.
  - I couldn't download the material for virtual box, but I could download each program separately and run on my (rather small and weak) computer
  - Det skulle vara intressant att ha föreläsningar istället för bara text-material
  - Some issues with the virtual machine. Rename "Link to adt" to AutodockTools
  - for me nothing
  - Beskrivningarna av installationen av VirtualBox mm
4. I vilken grad anser du att du har uppnått de kursmål som anges i kursplanen? (*Medel = 5,4, SD = 0,7*) (*1 = inte alls, 6 = i mycket hög grad*)

COMMENTS:

- Of course this course is just an elementary introduction. There is of course no limit for excellence. [5]
5. I vilken grad har du ansträngt dig för att lära dig så mycket som möjligt under kursen? (*Medel = 5,0, SD = 0,7*) (*1 = inte alls, 6 = i mycket hög grad*)

COMMENTS:

- I wanted to follow it more closely, but was on holidays for two weeks, so I ended up only doing the mandatory assignments. However, as the course was well structured it was fun to follow through. I will finish the remaining points on my own with the very good literature. [5]
  - Due to the technicalities difficulties I would say that I have used much more than half time for this course (ask my wife!) [6]
  - exactly what I had time for when following a part-time course and working full-time. I'm happy to have this book and be able to come back to it anytime [4]
  - I had some internet issues at the beginning because I was moving and I did study thoroughly the part on Molecular Dynamic because I thought it would be the same as I learned in my previous physics courses. I was wrong. [5]
6. Övriga synpunkter (*Antal obesvarade = 6*)
- Thanks for organizing such an interesting set of courses! I hope that other Universities will follow and also offer such nice lectures!
  - The teacher support has been very good and appropriate. This holds also to the comments and corrections to the different tasks. Just mail conversation lacks the physical direct dialogue format. This can result in ambiguities in the message that is mostly to the disadvantage to the student. This weakness of the mail format was outstandingly minimized by the teacher of this course.
  - Kursen är ganska lätt i förhållande till hur många studiepoäng den ger. Jag har i medeltal ägnat bara 2-3 h/vecka åt kursen.

KURSSPECIFIKA FRÅGOR

THIS IS THE TRANSLATION OF THE STANDARD-QUESTIONS ABOVE, INTO ENGLISH:

1. Your general opinion of the course is that it was: very bad - very good.
2. What did you think was particularly good with the course? Motivate.
3. What do you think could be improved? Motivate.
4. To what extent do you think you have achieved the course objectives as stated in the curriculum?: not at all - to a very high extent.
5. To what extent have you made an effort to learn as much as possible during the course?: not at all - to a very high extent.

6. Other viewpoints.

Tack för ditt bidrag att göra denna kurs ännu bättre! Thanks for your contribution to make this course even better!
